BAY RING
- “Re-centering the image of the City around Elliott Bay”
- “Creating new destinations and attractions around Elliott Bay”
- “Connecting diverse places and uses around Elliott Bay”

FRAMEWORK
- “Connecting the waterfront to key existing public spaces & destinations in the City”
- “Providing new and improved access to the waterfront at strategic locations”

TIDELINES
- “Creating varied pathways for walking, strolling, biking, and running”
- “Creating social spaces such as terraces, platforms, seating steps and overlooks”

FOLDS
- “Linking key destinations at different elevations in the City to the waterfront”
- “Creating significant, sculptural and iconic waterfront parks”
- “Creating large-scale public balconies and viewing platforms”

MARINE LIFE - RESTORED

BEFORE THE NEW CONVENTION CENTRE, the marine environment endured a century of industrial and commercial use.

As part of the project, the city and its partners undertook a comprehensive restoration plan to reestablish natural, undisturbed marine ecosystems. The project focused on creating new habitat areas, such as a restored intertidal zone, to support the growth of marine life.

The habitats are growing fast. Colonization has progressed into a diverse ecosystem of healthy marine life—just the thing for juvenile salmon.

Look out and you will see: Bull kelp, sea anemones, and seaweeds. Look for the numerous mussels, barnacles, starfish, sea urchins, and sea cucumbers. Harbour seals, river otters, minks, and the occasional bird such as the Harbor Seagull, Ringed Plover, and gulls. Not nature in the raw. Nature worked its magic.
